YOUR YES is a vote for:

Improving school safety measures - Our school buildings need upgrades for the safety and security of students and staff. Secure schools help ensure a healthy, safe space for our children.

Renovating or replacing aging facilities - Some schools are experiencing maintenance and structural problems due to their advanced age. Children can't learn in unsafe, deteriorating schools. Classroom additions, a new building to replace Robert Smalls International Academy, and facility renovations will provide students and staff with safer, stronger schools.

Adding classroom space to address enrollment growth - Enrollment has increased by more than 3,000 students in the past 11 years. Enrollment growth creates overcrowding, which stifles learning. Adding classroom space sets up a more productive learning environment for student success.

Upgrading technology infrastructure in our schools - District-wide technology infrastructure upgrades will help schools prepare our students for the challenges and opportunities of the 21st-century workforce.

ON NOV. 5, SAY YES TO OUR CHILDREN'S FUTURE
